

Proware announces Desktop SCSI-to-IDE RAID subsystem

Most cost-effective IDE RAID subsystem

November 2003 Taipei, Proware Technology Corp. is pleased to announce its newly innovated desktop SCSI-to-IDE RAID subsystem – the DP-430SI. Designed for midrange data storage requirements, high reliability and high performance, DP-430SI is ideal for entry-level and small business servers or power workstations.

- Supports RAID levels 0, 1, 0+1, 3, 5 and JBOD.
- Features an Intel i80303 64-bit RISC I/O processor.
- Supports up to 512MB of cache.
- High quality advanced cooling fans.
- Ultra 160 LVD host port.
- Supports up to four (4) 1" hot-swappable Ultra DMA hard drives.
- Redundant 200W hot-swappable power supplies with PFC.
- Supports hot spare and automatic hot rebuild.
- Transparent data protection for all popular operating systems.
- Tagged command queuing for 512 commands, allows for overlapping data streams.
- Allows online capacity expansion within the enclosure.
- Dual host channels support clustering technology.
- Built-in serial port interface for remote event notification.
- Real time drive activity and status indicators.
- Local audible event notification alarm.
- Browser-based Java GUI management utility.
