

## Proware announces Desktop SCSI-to-IDE RAID subsystem

### Most cost-effective IDE RAID subsystem

February 2004 Taipei, Proware Technology Corp. is pleased to announce its newly innovated desktop SCSI-to-IDE RAID subsystem – the DP-500SI. Designed for midrange data storage requirements, high reliability and high performance, DP-500SI is ideal for entry-level and small business servers or power workstations.

- Supports RAID levels 0, 1, 0+1, 3, 5 and JBOD.
- Features an Toshiba TMPR427ATB 64bit RISC I/O processor.
- Supports up to 64MB of cache.
- High quality advanced cooling fans.
- Ultra 160 LVD host port.
- Supports up to five (5) 1" hot-swappable Ultra DMA hard drives.
- 300W power supply.
- Multiple RAID selection.
- Bad block auto-remapping.
- Array roaming.
- Online RAID level migration.
- Variable stripe size.
- Background RAID Initialization.
- Supports hot spare and automatic hot rebuild.
- Transparent data protection for all popular operating systems.
- Built-in serial port interface for remote event notification.
- Real time drive activity and status indicators.
- Local audible event notification alarm.
