

## Proware offers full-line high-Availability NAS storage solutions

March 2006 Taipei, Proware Technology Corp. has added high-Availability NAS storage to its family of storage solutions. Proware has launched a series of proNAS HA NAS storage units, models SN-2803H4, SN-2803H, SN-2123H and SN-3163H.

Proware delivers the Simbolo NAS subsystem together with the proNAS management solution, proNAS High-Availability and proBackup client backup solution to provide businesses with the most flexible, scalable, securable and manageable NAS environment. It helps to control the total cost of ownership for data management.

The SN-3163H is an SATA II NAS Subsystem with proNAS 1.1 operating system. It enhances system availability, and manages complex storage environments easily. For improving business productivity and minimizing business risks, SN-3163H provides a volume replication and a volume snapshot function. It is also a full featured data protection system supporting RAID levels 0, 1, 0+1, 3, 5, 6 and JBOD. It supports hot spares, automatic hot rebuild and online capacity expansion within the enclosure. The SN-3163H features high capacity expansion, with 16

hot-swappable Serial ATA II hard disk drive bays in a 19-inch 3U rackmount unit, to give a maximum storage capacity of over 6 terabytes.

Available in 19-inch rackmount, the 2U 12-bays (SN-2123H) and 8-bays (SN-2803H4 & SN-2803H) offer another solution for high-density SATA II NAS subsystems, combining improved technology specifications with a new compact format.
