

Proware Brings Safety for Europe Market at CeBIT 2009

CeBIT
HANNOVER

Dear Proware International RAID partners:

Proware Technology Booth: Hall: 2, stand: A35

Proware Technology cordially invites you to visit our display at CeBIT 2009, the German international computer show, from **March 3-8, 2009**

Data flow through Enterprise, SMB, and Home are well-protected

【Global · Feb 24th】 The global leading RAID solution provider, Proware Technology Corp, will attend CeBIT 2009 from March 3rd to 8th at Hall 2 A35, bringing up its recognized family products of RAID subsystem, EPICa, proNAS, and miniEPICa, for the safety in Europe market.

EPICa will be provided for enterprise level customers with the needs of security and safety under stability and lower power consumption, which can be implemented via MAID 2.0. EPICa series models with excellent performance and majority for Europe large industries are seen as EP-4429D-F4A3, EP-3163D-F4S3, and EP-2123D-S3S3.

EP-D501-AA

EP-m501-AA

miniEPICa is designed to satisfy with business-level and classic living idea but with little secured. miniEPICa shows internal and external box for wherever you are, home or office, so you can have a great experience once data is secured in Proware's RAID subsystem, and in the coming future, NAS storage will be another large wave for home-based business.

proNAS can be seen as a nice remote tool to reduce the complicated process of data sharing. In Europe market, increasing home-based workers and extremely growing home-based entertainment are foreseen in the coming future. Small business will need a NAS system for employee easy to access their responsibility and duties from home. Without unnecessary traffic but still at the same contribution rate will be a big plus for both side, company and employee.

SP-403AA feature at 256 bit encryption for highest data security. With the regulations announced by EU and British government, finance industry, government agency, military, and database needed companies will must increase and enhance the level of data security. Proware's SP-403AA associated with 256 bit encryption, current highest level standard within regulations and laws, can be used for either business level or the industry with higher needs of data security.

About EPICa

EPICa family product is high capacity storage solutions as Proware's first large bay storage system. EPIC is defined as a long and glorious story containing significant events that leads to heroism. This indicates that Proware is deeply involved and dedicated to the storage industry as it promises to the users. With particular design of EPICa's logo, the logo can be used in Europe and America for globalization and in particular for system identification.

About Proware

Since 1994, Proware Technology Corp., a leader in the data storage marketplace, has been developing and supplying high availability, drive ready storage solutions for the channels and OEM customers in the Windows & open systems markets. Proware provides storage products for virtually all areas of the storage market. With a full range of RAID storage products, NAS Solutions & iSCSI Solutions, Proware offers complete solutions for all of your needs. Our products provide all storage interfaces including SAS, SCSI, iSCSI, SATA and Fibre Channel. Proware also offers high availability auto fail-over server (cluster) software that runs on software platforms such as Windows NT, 2000, Solaris, Linux, AIX, HP-UX and etc. Proware is awarded the National Award of Small and Medium Enterprises.
