

SecuTech Expo 2009

Booth No: **M1017 ~ M1018**

Dear Proware International RAID partners:

Proware Technology cordially invites you to visit our display at **SecuTech Expo 2009**, the Security show, from **Apr. 22~24, 2009**.

PROWARE Makes Safety at High-Resolution in SechTech Taipei 2009

Fully implemented in surveillance industry with the highest resolution such as Full D1

【Global · April】 The global leading RAID solution provider, PROWARE Technology Corp, will attend SechTech Taipei 2009 from April 22nd to 24th and presents to CCTV industry intricate and total solution for its industry's highest resolution, Full D1 resolution, to demonstrate the superior hardware standard to reach the most difficult needs of video transfer and resolution for security industry such as home-security and public safety via CCTV, DVR, NVR based on PROWARE's high standard hardware and the most optimal implementation, so the global leading surveillance firms can still hold the stable status at high speed transfer rate.

Regarding to ASD marketing report, the growth rate of CCTV market will reach 23% from 2008 to 2012 and NVR is considered as the main stream of surveillance market. "PROWARE will foreseen the mainstream product for the future market of CCTV is IP-cased surveillance," said by Senior Product Marketing Manager at PROWARE Technology Corp, "and our road show will be demonstrated by the topic and show international buyers how to bring up high-resolution video as the needs." Due to that, PROWARE will show proNAS series DN-500A-CM, associated with 9 ch NVR iSCSI IP-CAM, miniEPCIA family EP-D501-AA/EP-m501-AA feature at eSATA with the smallest size for limited space but at security needs for ATM or virtual banking system. Moreover, SN-3163-QX associated with Windows® XP can reach the high needs of NVR 32/64ch and even offer Full D1 resolution, only top 3 storage solution firms provide.

Moreover, it also shows that Europe and North U.S area was accounted at 85% of global CCTV market after 2006. Global sales and Marketing Manager at PROWARE , indicated "fulfilled with the full experience in Finance and public facility industry, PROWARE did have a great market share in Europe and US market but now we will move our focus on Asia Pacific Area." Clearly, the growing needs of public facility in Asia region will be next rising market to reduce the risk of home-based and work-based security issue.

Recently, PROWARE has been served the industry leading finance group in Taiwan for their surveillance system at the market share of 90%. Therefore, PROWARE's RAID and NAS subsystem is the 1st choice for facility, finance, and other traffic industry through IP surveillance, NVR, DVR firms around the world.
